Background

▶ Mobile has become an inseparable part of our life. It is enriching our life day by day with new possibilities. Android is a platform to level up our expectations to a new horizon. Fix-it is a utility android application that provides a platform to eradicate our daily difficulties in a hazardless way.

Sample Case Analysis

▶ Suppose you are in a trip to Dhaka for some days. One fine morning you discovered, your mobile display is broken. What would you do?

▶ The approximate solution is to reach nearby mobile center and solve your problem.

▶ Where to find such a place?

▶ Whom would you trust?

▶ Can you solve the problem yourself?

Fix-it: A new platform

▶ Fix-it develops a platform between customer and the various solution center or persons who are always ready to give you the required service. It is the platform where people will get to know the fixers in a more feasible, easy and efficient way.

Privileges

▶ User friendly – Easy to use application.
▶ Trustworthy – Find the best fixer who is trustworthy.
▶ Location based – Search by location and map.
▶ Portability – Super portable, just carry it in your android phone.
▶ Make easy lifestyle – Lifestyle will never be such easier.
